Attention:

Re: Updated Furniture Matrix  
Log 1323

Gentlemen:

As agreed in our August 19, 1986, meeting, we have updated the furniture matrix with the information requested by the Agency and submit that matrix dated August 25, 1986, herewith. Also enclosed are furniture specification sheets for any new items you did not receive with the packet we hand delivered to you in our meeting last week.

Please expedite getting a copy of this material and the enclosed minutes of the August 19, 1986, meeting, log 1322, to the appropriate FMD staff so they can get their comments back to us by September 2, 1986.

Very truly yours,

Wm. Everett Medling, AIA  
Project Manager

E. Medling

**DATE:** August 19, 1986**LOCATION:** FMD Conference Room**PURPOSE:** Present Furniture that would fit into Corry  
Jamestown Panel System.

SH&G presented 1) matrix of manufacturers with furniture pieces that will fit into the Corry Jamestown panel system provided in Bid Package 2; 2) workstation layouts, updated to include this furniture; and 3) cut sheets of furniture items presented in matrix.

Of the furniture systems presented by SH&G, the Agency had the following comments (comments about individual manufacturers are based on Agency investigation of the same product lines at an earlier date):

- Meridian will not make a full line of sizes and drawers independent of shells.
- Storwal is not acceptable because it is a Canadian manufacturer.
- Wright Line is structurally unstable for the Agency's purposes.
- A terminal table with an articulated keyboard attachment is not preferred because if a terminal table is used as a secondary work surface the keyboard in an unused position obstructs knee space. (Based on items the Agency had tested.)
- For G & J work stations the Agency will decide if a terminal table is necessary in lieu of a secretarial return.

STAT

August 26, 1986

Page 2

The Agency wants to use a terminal table with a back work surface that goes lower than the keyboard work surface. Terminal table sizes can vary to meet workstation space available. SH&G is to research.

SH&G is to verify that All Steel and Shaw Walker have desk shells (which allow options for pedestal types and placement), freestanding secretarial returns, mobile file pedestals and either a pencil drawer or pencil tray insert for a box drawer in their line. (These are new parameters for workstation furniture, not previously given to SH&G.)

SH&G is to update the furniture matrix by August 26, 1986, with the above information. FMD is to call SH&G by September 2, 1986, to advise what further SH&G assistance is necessary on this furniture planning.

In addition, the Agency requested SH&G submit a proposal for 1) documenting by CAD of furniture in reception, waiting, conference rooms, and office spaces including file cabinets, conservafiles, electronically operated storage files, seating, tables, etc. on a separate level of the CAD system. (Furniture inside each individual workstation is not included on this separate level.) This information is to be put on floor plans with Corry Jamestown partitions and a sample sent to [redacted] 2) SH&G is to develop new work station designations for more people in a private office (as planned by the Agency in Refit Up). 3) SH&G is to provide a count of workstations by type per floor. Place these workstations into computer graphics database.

COMPUTER  
SUPPORT

U.S. DEPARTMENT OF  
COMMERCE

SHAW-WALKER

Information flow has never been a more important ingredient to the American workplace.

Shaw-Walker recognized that fact in designing its line of Computer Support Furniture.

With Shaw-Walker Computer Support Furniture, you'll find a total support system. Ergonomically designed to provide maximum efficiency for the people who use it.

Shaw-Walker's Computer Support Furniture is flexible, functional and fast supportive. Rounded, radius design provides comfort and a soft feeling. Non-reflective surfaces prevent eye fatigue. Where adjustability is a requirement, tables adjust easily. When cost is a consideration, a full complement of stationary tables provide heights and work surface sizes to cost-effectively meet practically any equipment support need. An articulating keyboard arm, that is adjustable in four ways, can be mounted to computer tables, office system work surfaces or free-standing desks. The 125" diskette cabinet provides the ultimate storage protection for computer software. And a mobile pedestal unit with convenience tray top solves the problem of mobility, even within the most tightly confined spaces.

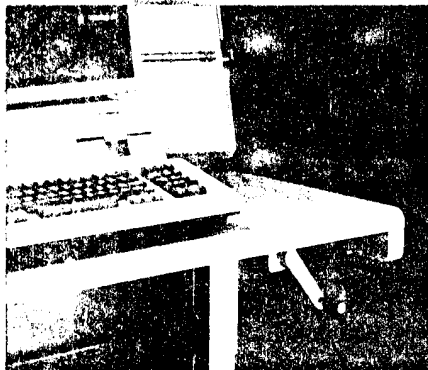

Being responsive to the changing needs of the office environment is nothing new to Shaw-Walker. From its beginning in 1899, the Shaw-Walker Company has been a leading name in office furniture and systems.

Shaw-Walker's "built like a skyscraper" trademark, showing a man jumping in the drawer of a filing cabinet, was introduced in 1913 to illustrate the strength and rigidity of its all-welded steel filing cabinets. Today that same quality and workmanship goes into every Shaw-Walker product.

Shaw-Walker offers a complete line of office furniture and systems that will meet your changing office furniture needs and provide the same quality craftsmanship, engineering excellence and service that has been our trademark for over 86 years.

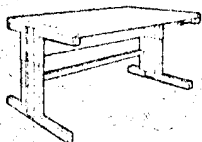

**SHAW-WALKER**

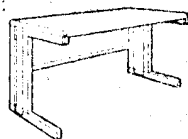

Single surface CRT table is adjustable vertically within a seven inch range for PC or VDT with attached keyboard. A retractable crank for height adjustment can be located on either right or left side.

Single surface adjustable computer support table is available either 30" width x 30" depth or 42" width x 30" depth.

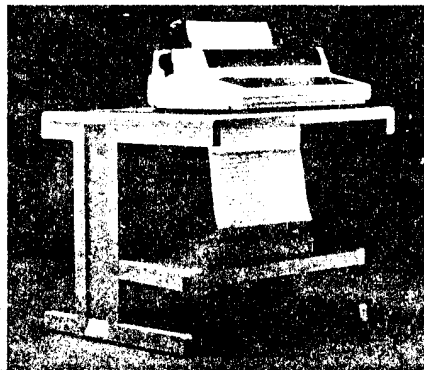

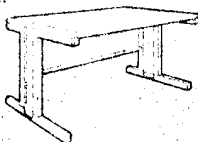

Non-adjustable machine height and desk height computer support tables 24" deep come in five widths:

- (30"W x 24"D)
- (42"W x 24"D)
- (60"W x 24"D)
- (66"W x 24"D)
- (72"W x 24"D)

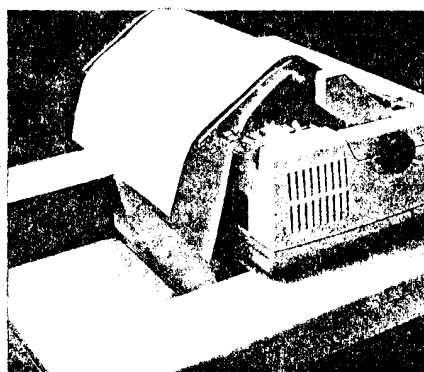

Non-adjustable machine height and desk height computer support tables 30" deep come in five widths:

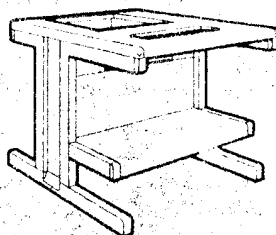

- (30"W x 30"D)
- (42"W x 30"D)
- (60"W x 30"D)
- (66"W x 30"D)
- (72"W x 30"D)

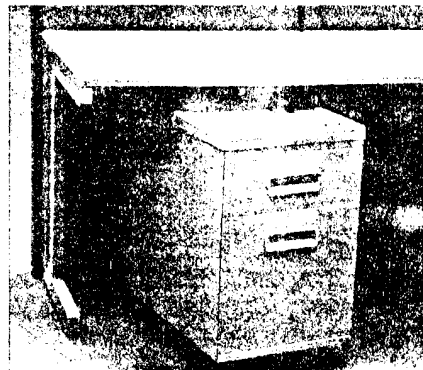

Printer table is designed to accommodate both bottom feed (shown here) and back-feed style printers. Paper stock shelf and receptacle neatly manage the in-use flow of computer forms.

Printer table is shown here with back-feed style printer in use.

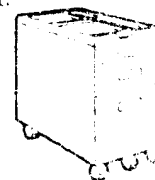

Printer table is 26"H x 30"W x 30"D.

Mobile pedestal, 24" height x 15" width x 24" depth, has convenience tray top and easy grasp hand hold pull.

Available in two styles of drawer configurations: half-height, box, file; or box, printout.

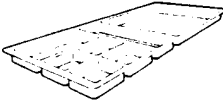

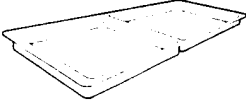

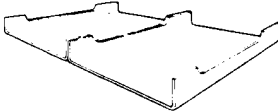

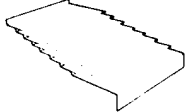

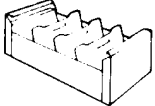

Mobile pedestals can be specified with either radius or rectangular recessed drawer pulls.

List price \$504.00

## FREESTANDING

**A** **justable Worksurfaces**

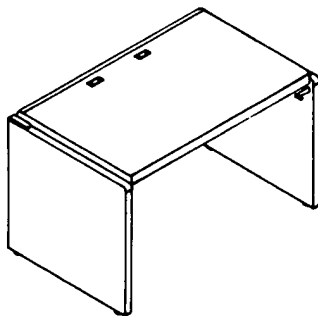

## LINKABLE:

**Description:**

1. The worksurface adjusts from 26" to 32" in height.
2. The worksurface is installed between "C" legs or end panels, manufactured after June 1, 1985.
3. Adjustable units can accept overhead storage if the workstation in which they are integrated includes a return worksurface or linked worksurface with pedestals providing necessary stability.
4. Includes two closure strips to cover "C" legs.
5. "C" legs, end panels and keyboard must be ordered separately.

2. Select finish color for closure strips from page 7. (Color should match "C" leg.)

Suffix	Option:	Price
Y	Fabric back on modesty panel	Add \$55 to price

**Option:**

1. "C" legs may be substituted for end panels. Add suffix to model number as follows:

Suffix	Option	Price
C	"C" leg	Shown above

## FREESTANDING

## edestals

**Description:**

1. Every 12" and 15" drawer includes cross file bars. 6" drawers include dividers.
2. Unit is supplied standard without a lock. If specified, locks (LK) are centrally located on the top drawer front.
3. All floor supported pedestals can be ordered as mobile units (M) with casters and a top. Mobile pedestals do not increase pedestal height. They will fit under worksurfaces.
4. Base covers are standard in Dark Neutral unless specified in matching finish. Base covers are easily removed to permit access to floor monuments.
5. Drawers have a Dark Neutral drawer pull.
6. Actual depth of WSD-20 pedestal is 19 1/4". Actual depth of WSD-30 pedestal is 29 1/8".
7. Pedestals with 15" deep drawers can accommodate computer printouts.

### Description

#### Bi-Level CRT Stand

- Provides freestanding support for CRT and keyboard.
- Feet and steel portion coated with soft textured vinyl.
- Adjustable worksurfaces: Front-adjusts 5" forward and backward, 25" to 32" in height; Back-adjusts 25" to 32" in height. Worksurfaces adjust independently.
- Available with or without 16½" back panel.
- Dual manual hand cranks standard, one for each worksurface.

#### Articulating Keyboard Arm

- Can be mounted under 24" or deeper worksurface.
- Worksurfaces pre-drilled to accept the arm in many locations.
- Swivels 180°, adjusts vertically 7", with lock-in capability throughout the 7" span.
- Safety ledge is an integral part of the soft molded tray to keep keyboard on the platform when in use.
- Worksurface arm moves in and out within a 24" range.

#### Keyboard Drawer

- Supports CRT keyboard.
- Mounts under any worksurface 24" or deeper.
- Includes five position out stop extension.

#### Keyboard Extension Tray

- Accommodates CRT keyboard while in use.
- Does not accommodate storage of keyboard under worksurface.

## Series 1700 Pedestals

## Specifications

## Standard Features

MERIDIAN

### Basic Shell

Shells are uniquely formed from a single sheet of 22 gauge textured steel. The textured exterior provides a non-glare finish which is resistant to fingerprints. The one piece exterior is electronically welded to a full front and back frame.

### Inner Frame

Each vertical and horizontal frame member is one piece 18 gauge steel, die cut and channel formed. All pedestals, except hinged door pedestals, contain front and rear full aircraft type frames. Members are electronically welded together to provide a dimensionally rigid frame.

### Drawer Fronts

Drawer fronts are formed from one piece of 22 gauge steel. All pulls are recessed and full width.

### Drawers

Drawers consist of a 22 gauge steel drawer body welded to 18 gauge steel side supports. All drawers are mounted on cold rolled steel ball bearing suspension slides. Drawers and slides are removable and interchangeable. Each box drawer, except in legal width pedestals, is equipped with one drawer divider. File and EDP drawers (except legal width pedestals) are equipped with a follower block.

### Bases

Base frames are made from square formed 18 gauge seam welded tube steel. All bases are removable and interchangeable and are equipped with 4 leveling glides. An optional caster kit consists of 4 twin wheel hooded casters, mounting plate and mounting screws.

The Meridian pedestal is based on modular construction. Drawers can be removed from the frame and rearranged within the steel cabinet to meet space and work requirements.

There are five types of drawers used in pedestals, each with modular dimensions. The size of 1 module is based on the space occupied by the (P) personal drawer.

Drawer Type	space occupied	ext. height
(P) personal	1 module	3
(B) box	2 modules	6½
(F) file	4 modules	13½
(E) EDP	5 modules	15½
(D) hinged door	8 modules	26

There is only one positioning restriction: the (P) personal drawer cannot be placed in the bottom position of the pedestal.

File and EDP drawers are set up for hanging folder filing and include a follower compressor. The box drawer includes one metal divider. A 2-section ball bearing slide is used on all personal and box drawers. A 3-section full extension ball bearing slide is used on the file and EDP drawers. The 3-section slide is also optional on the box drawer. See page 32 for other options available.

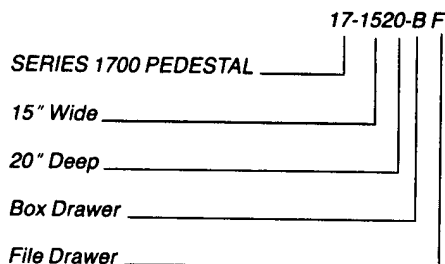

The pedestal product code uses a numbering system with a meaning for each character.

**Example: 17-1520-BF**

**"17"** First two digits indicate product category: 1700 Series Pedestal.

**"-1520"** Middle group of digits indicates product dimension: 15" wide by 20" deep.

**"-BF"** The last digits indicate the configurations of product, from top down: (B) box drawer on top, (F) file drawer on bottom.

To help determine filing capacities, the chart below lists the interior dimensions of each drawer type.

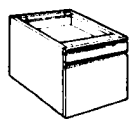

Drawer Type	high	wide	20" deep	24" deep	30" deep
15 1/4" wide pedestals					
(P)	1 3/4	12 1/8	16 1/2	20 1/2	25 5/8

# Series 1700

## Pedestal Options

	Description	Price Zone 1	Zone 2
<b>Lock</b>			
	Controls all drawers in a single pedestal.	\$27.	\$30.
<b>Casters</b>			
	For freestanding mobility. Adds 2 1/4" to height, 2 5/16" when used with base frame. D Pedestal requires base frame when casters used. Counterbalance weight and/or 5th Wheel recommended when casters added.	\$42.	\$47.
<b>5th Wheel</b>			
	Mounted on bottom file drawer to prevent tipping when drawer extended. Used with casters only, cannot be used with base frame.	\$29.	\$32.
<b>Leveling Glides</b>			
	Provides 1" height adjustment. Adds 1/2" (minimum) to pedestal height. For use without base frame. D Pedestal requires base frame when leveling glides are used.	\$14.	\$15.
<b>Slipper Glides</b>			
	For use without base frame. Adds 3/4" to pedestal height.	\$14.	\$15.
<b>D Pedestal Shelf</b>			
	Extra shelf for hinged door pedestal.	\$25.	\$28.
<b>Extension Slide</b>			
	3-Section full extension slides. For use with box drawers.	\$27.	\$30.
<b>Counterbalance Weight</b>			
	Should be used with freestanding pedestals. Helps balance pedestals against tipping.	\$53.	\$58.
<b>Touch Up Paint</b>			
	Available in any current standard color.	\$10.	\$11.
